DogeChu

WHITEPAPER

Introduction

Over $8.5 billion in cryptocurrency derivatives trading occurred per day for a total of $5 trillion per year. In some cases those trading occured on centralized exchanges, some of the global cryptocurrency investors prefer decentralized exchanges because they can maintain various standards of security, availability, reliability, and censorship resistance on a publicly verifiable blockchain technology. A primary constraint for existing decentralized exchanges is that they limit investors to a small subset of blockchain ecosystems. Another constraint is that they are slow and charge high fees due to performance limitations of their underlying blockchain. To capture the full market, the DogeChu ecosystem is here to liberate all investors and global Community traders from all of the negativities centered on the Cryptocurrency Industry.

The Problem Statement

DeFi applications seems to be the trending topics of the decentralized industry today. With the recent researched being carried out, there's a 60% responses showing that it present a dificult state for an average user to use safety, Due to lacks experience interacting with various smart contracts or transacting on the blockchain technology. With various

experiences of users being labeled as poor, the interface is often unnecessarily complex, and the pre-requisite technical knowledge serves as a high barrier and great risk of entry. On the trending Story, presenting another issue rocking the system is the issue of scams galore. With great demands being required from users such commitment from the interested user, With time requirements and effort spent in familiarizing and getting to know the applications and deciphering the jargon, many have preferred to stay away altogether. to continue its explosive growth, and bring on board the majority of the cryptocurrency DogeChu is here to play a superb role in this Global industries.

About Dogechu

DogeChu is a decentralized global exchange with an automated pricing and liquidity system. Inspired by the beloved dogecoin, DogeChu was created to make decentralized finance more efficient while rewarding its holders with high returns through our staking and yield farming ecosystem.

You get a better price for your tokens 99% of the time when you trade on DogeChu instead of a single DEX. Swap BNB and popular BEP20 tokens at the best pricing available with your

Smart Chain (BSC) Wallet! DogeChu is inspired by dogecoin to make decentralized finance more efficient while rewarding holders with high returns through our staking and yield farming ecosystem. Staking on DogeChu earns you 100% APY of DoguChu with no minimum amount required, any amount of DOGES can be staked on platform.

DogeChu is connected to top decentralized exchanges and synthetic asset providers. When you execute a swap through DogeChu, your order is routed to the sources offering the best prices on the market. You get a better price for your tokens 99% of the time when you trade on DogeChu instead of a single DEX. Swap BNB and popular BEP20 tokens at the best pricing available with your BSC wallet.

The platform is highly transparent with no hidden costs, and fast landing of applications applied. DogeChu, with a crosschain DEX, liquidity pools, and yield farming will become the gateway into DeFi system. With Defi Sweeping the Global world aside at the moment, DogeChu ecosystem, Will also be operating on a Defi note. DeFi which represents a broad category of Decentralized financial applications Dapp which are being developed on top of open, trust-minimized, programmable and censorship resistant networks to improve upon the legacy financial system or create entirely new usecases. It's runs and enabled on a distributed computing system. With the superior of industrial growth.

DogeChu has blazed itself to achieve various componential industrial vital improvement, through the next-generation enablement of multi-chain token swaps, encompound with other unique functionalities, In line towards provide a substainable solution to the present existing problems

The DogeChu ecosystem will aim to create a Governance Token, This governarce will allow users and Communities to decide on DOGES burns and other decisions making of the platform. DogeChu ecosystem Will empower it's platform by creating a unique bridge between BNB and ETH to reduce fee costs in various aspects of the project.

The DogeChu ecosystem will incorporate the following systems and services into it's global platforms:

- *Decentralized Asset Management*

- *NFTs and Digital Art*

- *Decentralized Launchpad and Exchange*

- *Staking and Farming mechanism*

Goverance System

The DogeChu Governance tokens which are tokens that developers create to allow token holders to help shape the future of a protocol. Governance token holders can influence decisions concerning the project such as proposing or

deciding on new feature proposals and even changing the governance system itself. In many cases, the changes proposed, vetted and then voted on through on-chain governance accessed by using governance tokens are applied automatically due to smart contracts. In other cases, the team maintaining the project tasked with various applances of changes, Which are likely to incorporate hiring of some individuals to carry out those tasks.

Advantage Of Using Dogechu

° Low Price: With DogeChu ecosystem platform, You get the lowest price without manually going to each
Dex Platforms

° Transaction: DogeChu gives you platform, in which you get Transaction at lowest fee from Dex

° Non Charges: DogeChu platform will incorporate, No charges fees for using DogeChu Platform. Which makes it stand out.

DogeChu Non-Fungible Token (NFT) Trading Cards & Card Games

DogeChu Roadmap

Phase 1

*Idea and team formed

*Website launch

*Big marketing and social media push

Phase 2

*List of DogeChu Token on Exchange

*1st DogeChu Airdrop

*DogeChu presale starts

Phase 3

*Influencer marketing push

*Applied at CoinGeko, CoinMarketCap, TrustWallet and BscScan

*Listed on CoinGeko and CoinMarketCap

Phase 4

*Listed on TrustWallet and BscScan

*Third party audit

*List of DogeChu Token on Big Exchange

Phase 5

*Large influencer push

*Listing on major CEX

*More Events from our community

Phase 6

* DogeChu NFT gaming

*DogeChu NFT Marketplace

*DogeChu Lottery

Phase 7

*Viral marketing with mega influencers

*Massive meme push through our NFT Marketplace

*Listing on more CEX

Phase 8

*Airdrop DogeChu NFT holders

* Launch of Mobile apps and DeFi wallet

*Launch of the DogeChu LaunchPad

Phase 9

*Global DogeChu community gathering at 100bn market cap to promote Trading Competition campaign

*Launch of borrowing , lending , Borrow platform

*Roadmap update

CoinMarketCap

BINANCE SMART CHAIN

CoinGecko

BscScan A product of Etherscan
